The European Interoperability Framework Toolbox, support and guidance for the implementation of the EIF

European Commission. Directorate-General for Informatics
DIGIT D2 – Interoperability Solutions for public administrations

Essential course information
Course title. The EIF Toolbox, support and guidance for the implementation of the EIF
Course Topic. Public sector leadership, innovation & knowledge sharing, EIF Implementation
Course Type. eLearning
Course tags. Interoperability, eGovernment, EIF, Recommendations, Pillars, digital solutions, guidance, toolbox.
Partner Service. DIGIT D2
Related EU Policy. Interoperability Policy
Course description. The course will give users an opportunity to learn about the EIF toolbox, a solution with a holistic approach which was designed to equip national public administrations with all the necessary tools so that they can align their National Interoperability Frameworks with the European Interoperability Framework and promote interoperability at national and European level. Through the course, users will gain access to the EIF Toolbox's guidance documents on the theoretical background of the framework (EIF Pillars), and the operational solutions covering the alignment and implementation aspects of this exercise. The EIF toolbox is a dynamic solution that will evolve over time emphasizing on practical success implementation stories, thus bridging the gap between public administrations and interoperable digital public services.
Target audience. Wide audience, from student to professionals
Language. English
Level. From Beginner to Expert
Learning Objectives. Understand the link between the EIF and The EIF Toolbox, the content of the EIF Toolbox, the structure of the EIF Toolbox and learn how to find the information and "travel" within the toolbox.
Course format. Video, story and presentation of the toolbox and its numerous functionalities
Course start date. TBA
Course end date. N/A
Dependency. No
Course duration. Approximately 20 minutes
